Barreiro | 9 – 13 may

Barreiro is located on the other side of the river Tagus in front of Lisbon.

At Sunday you'll be given instructions of how to go to the ferry station that will take you to Barreiro.

At Barreiro we will be waiting for you

ANPRI means Associação Nacional de Professores de Informática (National Association of Computer Science Teachers). It's located at Barreiro and has conditions to workshops.

About Douro vines, it's not possible to visit them, as they are located in the North of Portugal. So, we looked for the possibility of tasting Porto wine and we discover a very special place, in Lisbon downtown, named Casa Macário. There you'll have the possibility to taste the famous Porto wine.

Portuguese ancient technologies concerned to maritime expansion, will be seen at the Navy Museum, and we will work about the artifacts with informatics technologies (ANPRI) and we are also going to paint tiles to use them in our scenarios.
